**1. Reduction of Deferred Tax Asset ("DTA")**

Given the current and expected business performance in the coming years, following cautious evaluation of the possibility of realizing the DTA, the Company plans to reduce the DTA and recognize income taxes adjustment of 90 million yen for the fiscal year ended June 30, 2015.

### (3) Reasons for Revision

In the electronics machinery business, component procurement relating to the increased production of telemetrics terminal units has exceeded its business target, and the Company foresees such development to contribute to growth in operating profits and ordinary income, despite sales of sensor module for ATM bill validator fell below its business target. Nevertheless, due to the impacts from the aforementioned reduction of DTA, the Company expects the annual net income for this fiscal year ended June 2015 to fall below the previous forecast.
