### Operating Environment

The U.S. economy has remained steady with improvements in employment and income environments. Stable growth has also been observed in other regions. Although interest rates remain low worldwide, rate increases in the U.S. and the scaling back of quantitative easing policies in Europe are expected. The market has become more conscious about increasing market volatility. In addition, there are political and geopolitical tensions in certain regions that need to be monitored carefully.

The Japanese economy, as a whole, is continuing to experience moderate recovery.

Cash flows provided by financing activities were ¥143,582 million during the fiscal year, compared to the outflow of ¥33,459 million during the previous fiscal year. In addition, with regards to the decision of whether to buy back shares, ORIX aims to act with flexibility and swiftness while considering various factors such as the adequate level of the Company's retained earnings, the soundness of its financial condition and external factors such as changes in the business environment, share price and its trend and target performance indicators.

Based on this fundamental policy, the dividend payout ratio for the fiscal year ended March 31, 2018 has been decided at 27%, up 2% from the fiscal year ended March 31, 2017, and the annual dividend has been decided at 66.00 yen per share (interim dividend paid was 27.00 yen per share and year-end dividend has been decided at 39.00 yen per share) from 52.25 yen per share in the previous fiscal year.

In the last three fiscal years ended March 31, 2018, in the domestic market, ORIX steadily developed its auto related business through its solid customer base, increased the number of life insurance policies through products that meet customer needs as well as enhanced sales channels and expanded the renewable energy business and electric power retailing business in the environment and energy business. In the overseas business, ORIX developed its fee businesses in the Americas, increased profit and assets under management in ORIX Corporation Europe N.V. and increased assets in the aircraft related business.

Regarding new investment in key areas, ORIX set a precedent for its overseas development through its investments in the environment and energy business in the Americas and Asia, and expanded its fee businesses through several M&A transactions mainly in the Americas. Regarding the private equity businesses, ORIX built up a track record of investment and sales in Japan and also made several new investments in the Americas and Asia.

Furthermore, ORIX launched its concession business and joint airport operation business which is a first for a private operator.

As a result of above-mentioned measures, as of March 31, 2018, ORIX achieved a net income attributable to ORIX Corporation shareholders of ¥313.1 billion and ROE of 12.1% meeting its targets of net income of ¥300 billion and ROE around 11% to 12%.

From the fiscal year ending March 31, 2019, ORIX aims to achieve annual net income attributable to ORIX Corporation shareholders growth of between 4% to 8%, and to maintain ROE above 11% by increasing asset efficiency through quality asset expansion in order to capture business opportunities and increasing capital efficiency by strengthening profit-earning opportunities such as fee-based businesses.

Three-year trends in performance indicators are as follows.

	March 31, 2016	March 31, 2017	March 31, 2018
Net Income Attributable to ORIX Corporation Shareholders (millions of yen)	260,169	273,239	313,135

### **(3) Medium-Term Strategic Directions FY2019-2021**

ORIX manages its business portfolio by dividing it into six segments: Corporate Financial Services, Maintenance Leasing, Real Estate, Investment and Operation, Retail, and Overseas Business.

Furthermore, taking risk and capital requirements into account, ORIX groups these six segments into three categories: “Finance”, “Operation” and “Investment.” The “Finance” business is ORIX’s customer base and source of information. However, given that the low interest rate environment makes growth difficult in financial businesses, ORIX will continue to focus on “Operation” and “Investment” to grow stable earnings and will proactively enter new markets to nurture its next core businesses.

The “Operation” business for which operational risk is taken by ORIX is positioned as ORIX's growth driver and source for new and stable earnings. ORIX will engage in M&A and expand new investment with a focus on the environment and energy business, asset management business, concession business and life insurance business as well as other new business areas coming from the change in society and the market.

The “Investment” business provides ORIX with opportunities to develop new businesses. ORIX focuses mainly on private equity businesses in Japan and overseas, aircraft and ship-related operations and will expand the scale of those businesses.

### **(4) Corporate Challenges to be Addressed**

It is vital for ORIX to continue to maintain and develop a business structure that can be flexibly and swiftly adapted to the changing business environment. ORIX will take the following three steps in order to achieve the aforementioned mid-term strategic directions.

1. Further advancement of risk management
2. Pursue transactions that are both socially responsible and economically viable
3. Create a fulfilling workplace

1. Further advancement of risk management: Recognizing that business expansion and growth has diversified and globalized our risk, strengthen the business foundation which supports our growth by readily and continuously utilizing our risk management structure and our ability to assess risks.
2. Pursue transactions that are both socially responsible and economically viable: Pursue transactions that are socially responsible from a social and environmental standpoint while providing products and services that are valued by clients and improve ORIX’s overall profitability.
3. Create a fulfilling workplace: Focus on ORIX’s strengths as a global organization to create a fulfilling work environment for all employees regardless of nationality, age, gender, background or position.

## **3. Consideration in the Selection of Accounting Standard**

We have been preparing our financial statements in accordance with U.S. GAAP. We believe that U.S. GAAP is the accounting standard that most appropriately reflects our business activities in our financial reporting.

Reporting in U.S. GAAP enables us to maintain consistency and comparability with past financial results and we believe that is beneficial to our stakeholders.

**Note 1:** The Company evaluates the performance of segments based on income before income taxes, adjusted for net income attributable to the noncontrolling interests and net income attributable to the redeemable noncontrolling interests before applicable tax effect. Tax expenses are not included in segment profits.

**Note 2:** For those VIEs that are used for securitization and are consolidated, for which the VIE's assets can be used only to settle related obligations of those VIEs and the creditors (or beneficial interest holders) do not have recourse to other assets of the Company or its subsidiaries, segment assets are measured based on the amount of the Company and its subsidiaries' net investments in the VIEs, which is different from the amount of total assets of the VIEs, and accordingly, segment revenues are also measured at a net amount representing the revenues earned on the net investments in the VIEs. Certain gains or losses related to assets and liabilities of consolidated VIEs, which are not ultimately attributable to the Company and its subsidiaries, are excluded from segment profits.

**Note 3:** Inter-segment transactions are included in segment revenues, and eliminations of inter-segment transactions are included in the difference between segment total and consolidated amounts.
