- (1) Independent Director must not be a principal trading partner*, or Executive Officer (including operating officers, hereinafter the same) or an employee of a principal trading partner of the ORIX Group as of now and during the last one year.

* A “principal trading partner” refers to an entity with a business connection with the ORIX Group with a transaction amount equivalent to 2% of consolidated total sales of either the ORIX Group or the entity (consolidated total revenues in the case of the ORIX Group) or one million US dollars, whichever is greater, in the latest fiscal year or the preceding three fiscal years.

- (2) Independent Director did not receive directly a large amount of compensation (10 million yen or higher in one fiscal year) outside the Director’s compensation from the ORIX Group in the latest fiscal year or the preceding three fiscal years. Further, no corporation or other entity for which such Independent Director serves as consultant, accounting specialist, or legal expert, received a large amount of compensation (equivalent to more than the greater of 2% of consolidated total revenues (or consolidated total sales), or one million US dollars) from the ORIX Group as of now and in the last one year.

- (3) Independent Director is not a major shareholder of the Company (holding 10% or higher of issued shares), or representative of the interests of a major shareholder as of now.

- (4) Independent Director was not an executive officer, etc. of a company having a relationship of concurrent directorship* with the Company in the latest fiscal year or the preceding three fiscal years.

* “Concurrent directorship” refers to such case that an Executive Officer of the Company or its subsidiaries serves as director of a company in which the Independent Director has been an Executive Officer, also assumes the post of Outside Director of the Company.

- (5) Independent Director was not a member of the executive board (limited to those who execute business) or any other person executing business (referring to an officer, corporate member or employee who executes business of the organization) of any organization (including public interest incorporated associations, public interest incorporated foundations and non-profit corporations) that have received a large amount of donation or assistance (annual average of 10 million yen or higher over the past three fiscal years) from the ORIX Group.

(6) Corporate Challenges to be Addressed

1) Medium-term strategic directions FY2019-2021

ORIX manages its business portfolio by dividing it into six segments: Corporate Financial Services, Maintenance Leasing, Real Estate, Investment and Operation, Retail, and Overseas Business.

Furthermore, taking risk and capital requirements into account, ORIX groups these six segments into three categories: “Finance”, “Operation” and “Investment.” The “Finance” business is ORIX’s customer base and source of information. However, given that the low interest rate environment makes growth difficult in financial businesses, ORIX will continue to focus on “Operation” and “Investment” to grow stable earnings and will proactively enter new markets to nurture its next core businesses.

The “Operation” business for which operational risk is taken by ORIX is positioned as ORIX’s growth driver and source for new and stable earnings. ORIX will engage in M&A and expand new investment with a focus on the environment and energy business, asset management business, concession business and life insurance business as well as other new business areas coming from the change in society and the market.

The “Investment” business provides ORIX with opportunities to develop new businesses. ORIX focuses mainly on private equity businesses in Japan and overseas, aircraft and ship-related operations and will expand the scale of those businesses.

2) Development of business structure that supports management strategies

It is vital for ORIX to continue to maintain and develop a business structure that can be flexibly and swiftly adapted to the changing business environment. ORIX will take the following three steps in order to achieve the aforementioned mid-term strategic directions.

Further advancement of risk management: Recognizing that business expansion and growth has diversified and globalized our risk, strengthen the business foundation which supports our growth by readily and continuously utilizing our risk management structure and our ability to assess risks.

Pursue transactions that are both socially responsible and economically viable: Pursue transactions that are socially responsible from a social and environmental standpoint while providing products and services that are valued by clients and improve ORIX’s overall profitability.

Create a fulfilling workplace: Focus on ORIX’s strengths as a global organization to create a fulfilling work environment for all employees regardless of nationality, age, gender, background or position.

- 2) Matters relating to the policy regarding amount and calculation of compensation for Directors and Executive Officers
- a. Method for deciding the policy

The Company decides its compensation policy for fiscal 2018 by means of its Compensation Committee comprising non-Executive Directors.

b. Details of the Policy

ORIX's business objective is to increase shareholder value over the medium- to long-term. ORIX believes in the importance of each Director's and Executive Officer's responsibly performing his or her duties and cooperation among different business units in order to achieve continued growth of the ORIX Group. The Compensation Committee believes that in order to accomplish such business objectives, Directors and Executive Officers should place emphasis not only on performance during the current fiscal year, but also on medium- to long-term results. Accordingly, under the basic policy that compensation should provide effective incentives. ORIX takes such factors into account when making decisions regarding the compensation system and compensation levels for Directors and Executive Officers. Taking this basic policy into consideration, we have established separate policies for the compensation of Directors and Executive Officers in accordance with their respective roles.

i. Compensation Policy for Directors

The compensation policy for Directors who are not also Executive Officers aims for composition of compensation that is effective in maintaining supervisory and oversight functions of Executive Officers' performance in business operations, which is the main duty of Directors. Specifically, ORIX's compensation structure for Directors consists of fixed compensation and share-based compensation. Fixed compensation is, in principal, a certain amount that is added to the compensation of the chairperson and member of each committee. Share-based compensation reflecting medium- to long-term performance is granted at the time of retirement in the form of ORIX's shares, which is calculated based on the number of points earned and accumulated by the individual while in office until retirement. In addition, the Company strives to maintain a competitive level of compensation with Director compensation according to the role fulfilled, and receives third-party research reports on Director compensation for this purpose.

ii. Compensation Policy for Executive Officers

The compensation policy for Executive Officers, including those who are also Directors, aims for a level of compensation that is effective in maintaining business operation functions, while also incorporating a component that is linked to current period business performance. Specifically, ORIX's compensation structure for Executive Officers consists of fixed compensation, performance-linked compensation, and share-based compensation.

Fixed compensation is decided for each individual based on a standard amount for each position.

For Executive Officers, compensation linked to business performance for fiscal 2018 uses the level of achievement of the consolidated net income target as a performance indicator, adjusting 50% of the position-based standard amount within the range of 0% to 200% while, at the same time, using the level of achievement of the target of the division for which the relevant Executive Officer was responsible, adjusting 50% of the position-based standard amount within the range of 0% to 200%. In the case of the Representative Executive Officers, the consolidated net income target is used as a performance indicator, adjusting the standard amount within the range of 0% to 200%.

For share component of compensation reflecting medium- to long-term performance, Executive Officers are granted points on an annual basis based on their position for their period of service, and they are paid in ORIX shares corresponding to the amount of points they have accumulated at the time of retirement. The points received each year shall be the result of adjusting 50% of the position-based standard points within the range of 0% to 200% based on the level of achievement of the consolidated net income target, which is used as the consolidated performance indicator, while at the same time adjusting 50% of the position-based standard points within the range of 0% to 200% based on the level of achievement of the operating results target of the division for which the relevant Executive Officer was responsible. In the case of the Representative Executive Officers, the points received each year shall be the result of adjusting the standard points within the range of 0% to 200% based on the level of achievement of the consolidated net income target, which is used as the consolidated performance indicator.

In addition, based on the outcome of a third-party compensation research agency investigation, the Company strives to maintain a competitive level of compensation with executive officer compensation functioning as an effective incentive.

(Reference) Basic Policy and System in Corporate Governance

(1) Corporate Governance System

1) Basic policy in corporate governance

ORIX believes that a robust corporate governance system is a vital element of effective enhanced management and therefore has established sound and transparent corporate governance to carry out appropriate business activities in line with our core policies and ensure objective management.

The Company's Corporate Governance System is characterized by:

- separation of execution and supervision through a “Company with Nominating Committee, etc.” board model;
- Nominating, Audit and Compensation Committees composed entirely of non-Executive Directors and the Audit Committee composed entirely of outside directors;
- all outside directors satisfying “Requirements for Independent Directors” (Please refer to Proposal 2, “Election of Twelve (12) Directors” in the reference documents for the General Meeting of Shareholders); and
- all outside directors being highly qualified in their respective fields

2) Rationale behind adopting ORIX's Corporate Governance System and history of ORIX's system

The Company believes that swift execution of operations is vital to effectively responding to changes in the business environment. Furthermore, the Company believes that the Company promotes improved management transparency through a corporate governance system in which outside directors, who are experts with expertise in their respective fields, monitor and advise on legal compliance and appropriate execution of operations. Based on these principles, the Company's Board of Directors possesses oversight function, and under the “Company with Nominating Committee, etc.” board model, delegates certain responsibilities to the three committees (Nominating, Audit and Compensation Committees) to carry out the role of effective governance.

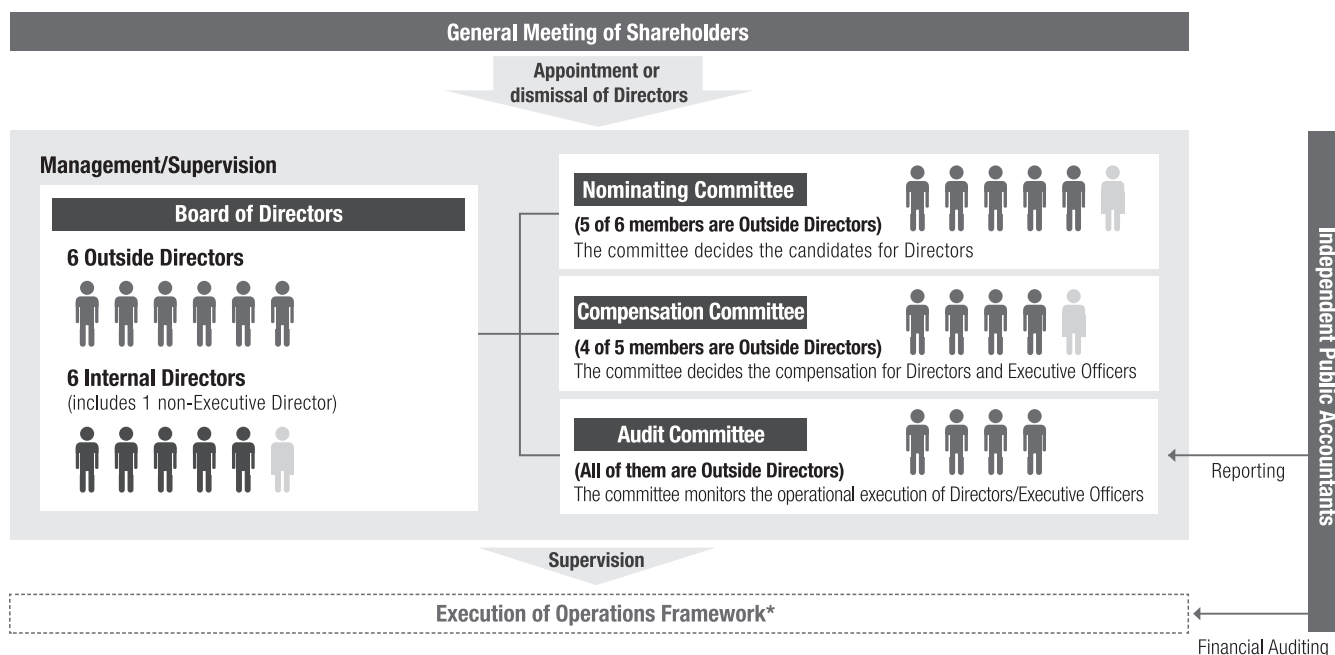

Oversight by directors is separate from the execution of operations with the three committees (Nominating, Audit and Compensation Committees) that form the heart of the Board of Directors. Each committee is formed entirely by non-Executive Directors to help avoid conflicts of interest with our shareholders. In addition, all outside directors must meet the objective and specific “Requirements for Independent Directors” as set forth by the Nominating Committee.

Below is a summary of the history of the Company's corporate governance system;

June 1997	Established Advisory Board
June 1998	Introduced Corporate Executive Officer System
June 1999	Introduced Outside Director System
June 2003	Adopted the “Company with Committees” board model
May 2006	Adopted the new “Company with Committees” board model in line with the enactment of the Companies Act of Japan
May 2015	Adopted the new “Company with Nominating Committee, etc.” board model in line with the amendment of the Companies Act of Japan
