

LRQA Independent Assurance Statement

Relating to ORIX Corporation's Environmental Data within its Integrated Report 2024 and Corporate website for the fiscal year ended March 2023 and ended March 2024

This Assurance Statement has been prepared for ORIX Corporation in accordance with our contract.

Terms of Engagement

LRQA was commissioned by ORIX Corporation ("the Company") to provide independent assurance on its environmental data within its Integrated Report 2024 and Corporate website ("the report") for the fiscal year ended March 2023 (1 April 2022 - 31 March 2023)¹ and ended March 2024 (1 April 2023 - 31 March 2024)², against the assurance criteria below to a limited level of assurance at the materiality of the professional judgement of the verifier and using ISO 14064-3:2019 for greenhouse gas (GHG) emissions.

Our assurance engagement covered the Company and its group companies' operations and activities in Japan and overseas countries and specifically the following requirements:

- Verifying conformance with the Company's reporting methodologies for the selected datasets:
- Evaluating the accuracy and reliability of data for only the selected indicators listed below:

Environmental³

- Scope 3 GHG emissions (Category 2, 3, 6, 7, 11, 13, 15)⁴ (tonnes CO₂e)

Our assurance engagement excluded the data and information of the Company's suppliers, contractors and any third-parties mentioned in the report.

LRQA's responsibility is only to the Company. LRQA disclaims any liability or responsibility to others as explained in the end footnote. the Company's responsibility is for collecting, aggregating, analysing and presenting all the data and information within the Report and for maintaining effective internal controls over the systems from which the Report is derived. Ultimately, the Report has been approved by, and remains the responsibility of the Company.

LRQA's Opinion

Based on LRQA's approach nothing has come to our attention that would cause us to believe that the Company has not, in all material respects:

- Met the requirements of the criteria listed above
- Disclosed accurate and reliable environmental data

The opinion expressed is formed on the basis of a limited level of assurance⁵ and at the materiality of the professional judgement of the verifier.

¹ Data for fiscal year ended March 2023 only cover category 6 and 7.

² In line with the fiscal years of Group companies, partly including 1 Jan 2023 to 31 Dec 2023.

³ GHG quantification is subject to inherent uncertainty.

⁴ Category 11 and 13 only cover motor vehicles, real estate, ships and aircraft.

⁵ The extent of evidence-gathering for a limited assurance engagement is less than for a reasonable assurance engagement. Limited assurance engagements focus on aggregated data rather than physically checking source data at sites. Consequently, the level of assurance obtained in a limited assurance engagement is lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

LRQA's Approach

LRQA's assurance engagements are carried out in accordance with ISO 14064-3:2019. The following tasks were undertaken as part of the evidence gathering process for this assurance engagement:

- Auditing the Company's data management systems to confirm that there were no significant errors, omissions or misstatements in the report. We did this by reviewing the effectiveness of data handling procedures, instructions and systems, including those for internal verification.
- Interviewing with those key people responsible for compiling the data and drafting the report.
- Sampling datasets and traced activity data back to aggregated levels;
- Verifying the historical data and records for the fiscal year ended March 2023 and ended March 2024; and
- Visiting HO of the Company to confirm the data collection processes, record management practices.

Observations

Further observations and findings, made during the assurance engagement, are:

- It is expected that the Company will continue to maintain the data management systems to ensure efficient and accurate aggregation and calculation of environmental data.

LRQA's Standards, Competence and Independence

LRQA implements and maintains a comprehensive management system that meets accreditation requirements for ISO 14065 Greenhouse gases – Requirements for greenhouse gas validation and verification bodies for use in accreditation or other forms of recognition and ISO/IEC 17021-1 Conformity assessment – Requirements for bodies providing audit and certification of management systems – Part1: Requirements that are at least as demanding as the requirements of the International Standard on Quality Control 1 and comply with the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants.

LRQA ensures the selection of appropriately qualified individuals based on their qualifications, training and experience. The outcome of all verification and certification assessments is then internally reviewed by senior management to ensure that the approach applied is rigorous and transparent.

This is the only work undertaken by LRQA for the Company and as such does not compromise our independence or impartiality.
